Errata: Evolutionary inference via the Poisson indel process

October 13, 2013

1. In Equation (1) of the supplement, the order of the sum and product, and the argument of $b(\cdot)$, are incorrect. The corrected equation is:

$$\prod_{w \in \text{child}(v)} \sum_{\sigma' \in \Sigma_\epsilon} \exp(b(w)Q)_{\sigma,\sigma'} \tilde{f}_w(\sigma').$$

This was due to an error in the typographic process; the correct expression was used in the rest of the paper and supplement (see for example in Section 5 of the supplement), as well as in the software implementation. Many thanks to Vincent Zhai for catching this.
