

PEER REVIEW

On the **GREEN** paper write

One thing about peer feedback that helps you the most

On the **RED** paper write

One thing about peer feedback that could be improved

(Papers redistributed ...)

Imagine you are the writer of one comment in front of you. WHY do you think they wrote what they did?

- **Green**: WHY would that feedback be helpful?
- **Red**: WHY does that type of feedback need improvement?

Conclusion:

- **Green** (helpful): Constructive, specific suggestions that help the writer to move forward and improve the next version.
- **Red**: (unhelpful): Comments that are unrelated to the work, too broad, or negative without direction for improvement; the writer cannot move forward.

Based on an idea of Alice Cassidy
